The purpose of this article is to summarize this wide-ranging body of literature in an effort to draw together our current state of knowledge regarding the impact of gender and family on retirement outcomes.

SAGE Books - Gender, Family, and Economy: The Triple Overlap
The 'triple overlap' refers to the link between gender stratification, the household and economic variables. In this volume, leading sociologists examine this overlap as a totality, providing theoretical concepts and new research on how the triple overlap works, both inside the family and within the broader context of society.

A theory of family, economy, and gender

The purpose of this article is to summarize this wide-ranging body of literature in an effort to draw together our current state of knowledge regarding the impact of gender and family on retirement outcomes. This
article outlines the demographic, sociological, and regulatory factors that may be responsible for these observed differences.

**Gender, the Family, and Economy - Oxford Handbooks**
With survey data, the study examines gender as a conditional variable in the effects of family satisfaction and economic strain on psychological well-being among married people. Analysis supports the hypothesis that the positive effect of family satisfaction is greater among women than among men.

**The Effects of Gender, Family Satisfaction, and Economic ...**
The relationship between families and gender continues to be the subject of dispute in the social sciences. The ‘linguistic turn’ in the study of gender relations has directed attention to the most general cultural determinants of the gender identity of family members. The economic significance of nonmarket work has directed fresh attention to the process of home production.

**Gender and Family - an overview | ScienceDirect Topics**
Anh also said gender inequality in labour, employment and income and the women's decision-making power in the family is still limited, adding that domestic and other forms of gender-based violence still exist. Inequality in the implementation of gender roles has a negative effect on family development and limits gender equality progress.

**Gender roles in family key to improving equality - Society ...**
In summary, families exist because of social values, systems, laws, rules, religions and norms that define the family unit. But families must exist within the realities of stability and instability in economy, social structure, class, war and peace, culture and subculture, and many other factors which can be quite complex and difficult to isolate and identify.

**How Socio Economic Status Affects Family Life ...**
Gender Equality and the Economy While gender inequalities have diminished in some aspects of life, they remain deeply rooted in others. The vast majority of women around the world do not enjoy equality in economic participation, physical security, access to land, and financial resources or earnings.
